

OBJECTIVES OF THE INVESTIGATION

The idea of this work is making predictions of soccer matches, searching this objective i create 2 dataset and apply to the different classifiers.

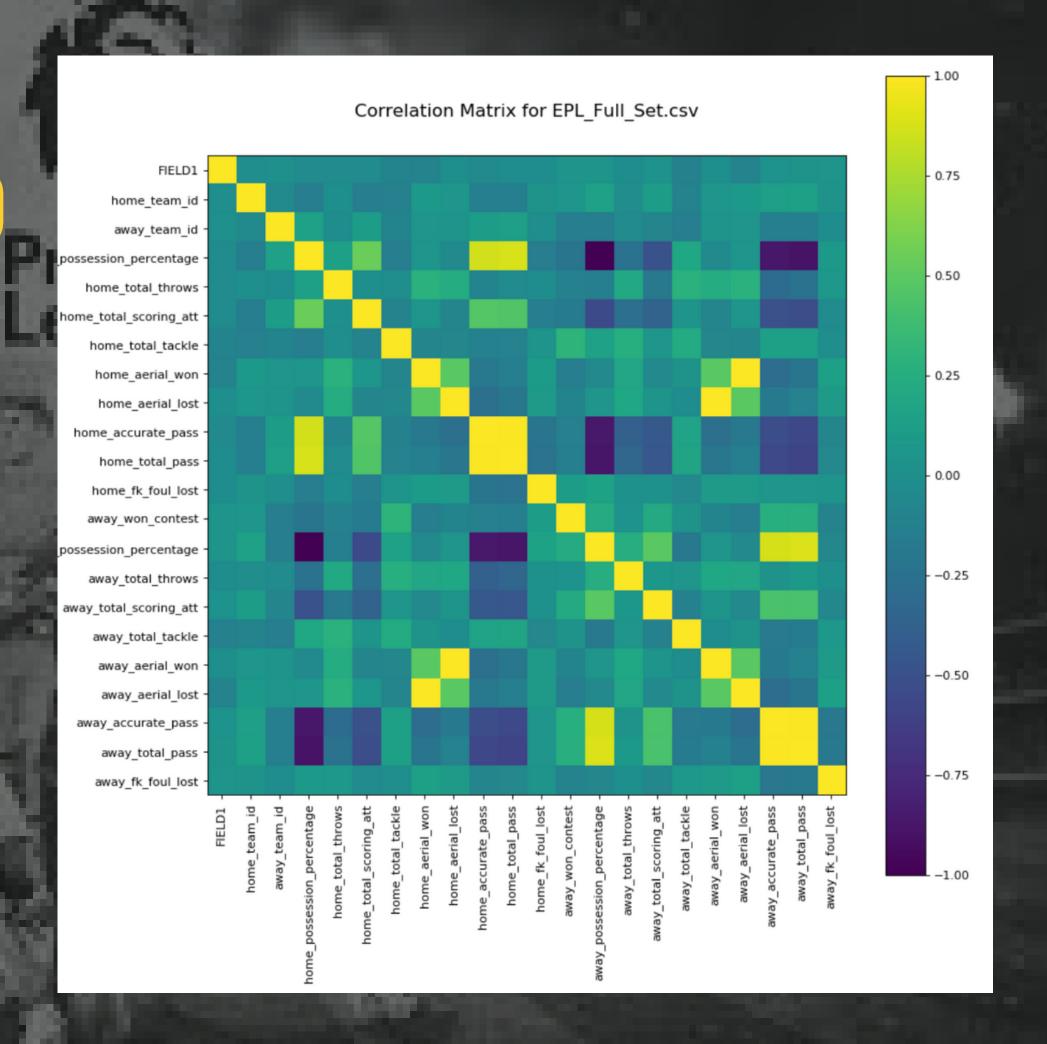

DATA COLLECTION WITH PYTHON AND KAGGLE

At the beginning I used a dataset from kaggle but it was impossible to get good results from it, searching for new data i found a dataset formed of jsons. With this json and python i create a dataset with csv format.

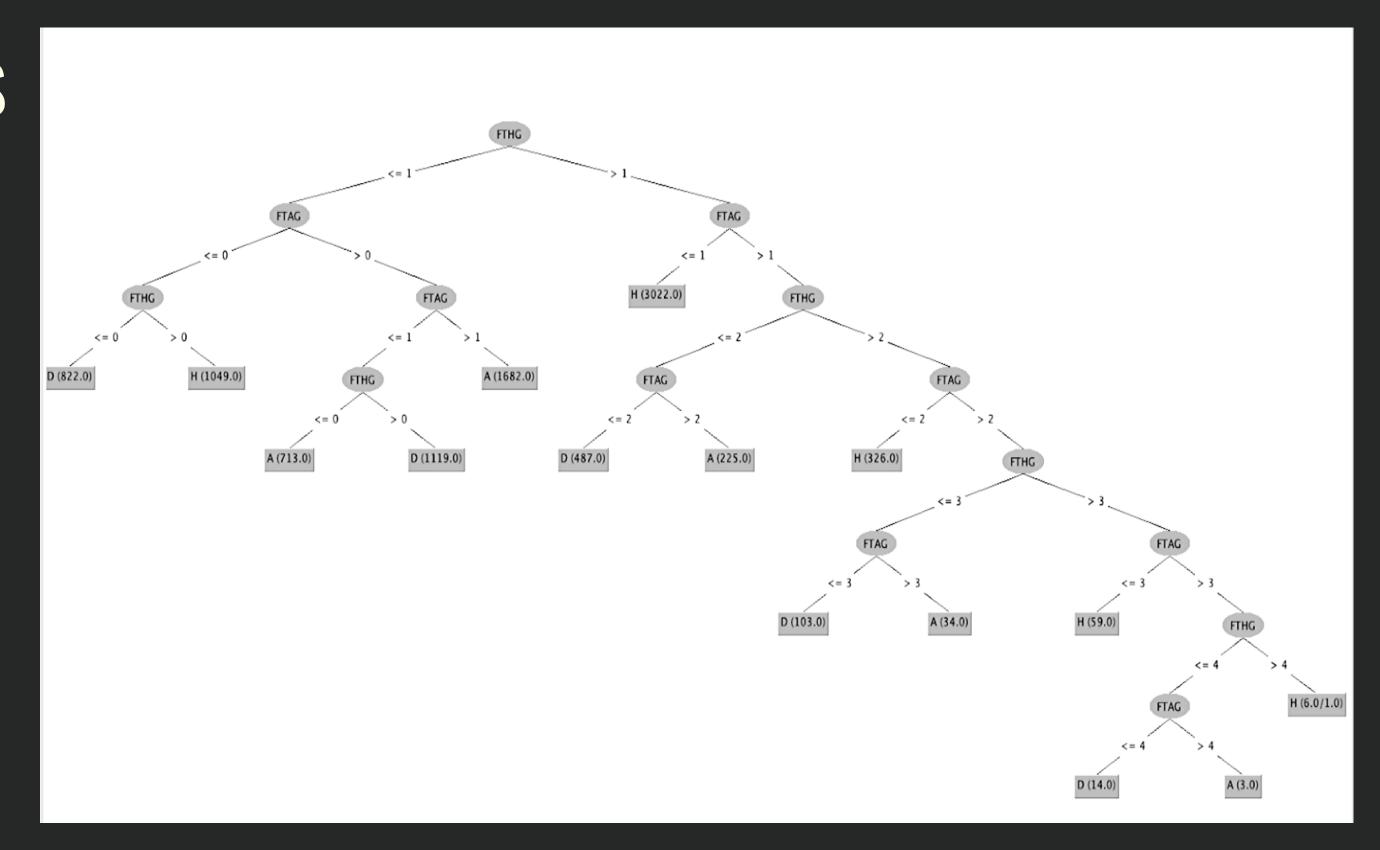

After that I also try forming a new data adding the players, but it was impossible to find related data in them.

You can find the data in kaggle as EPL Full Data

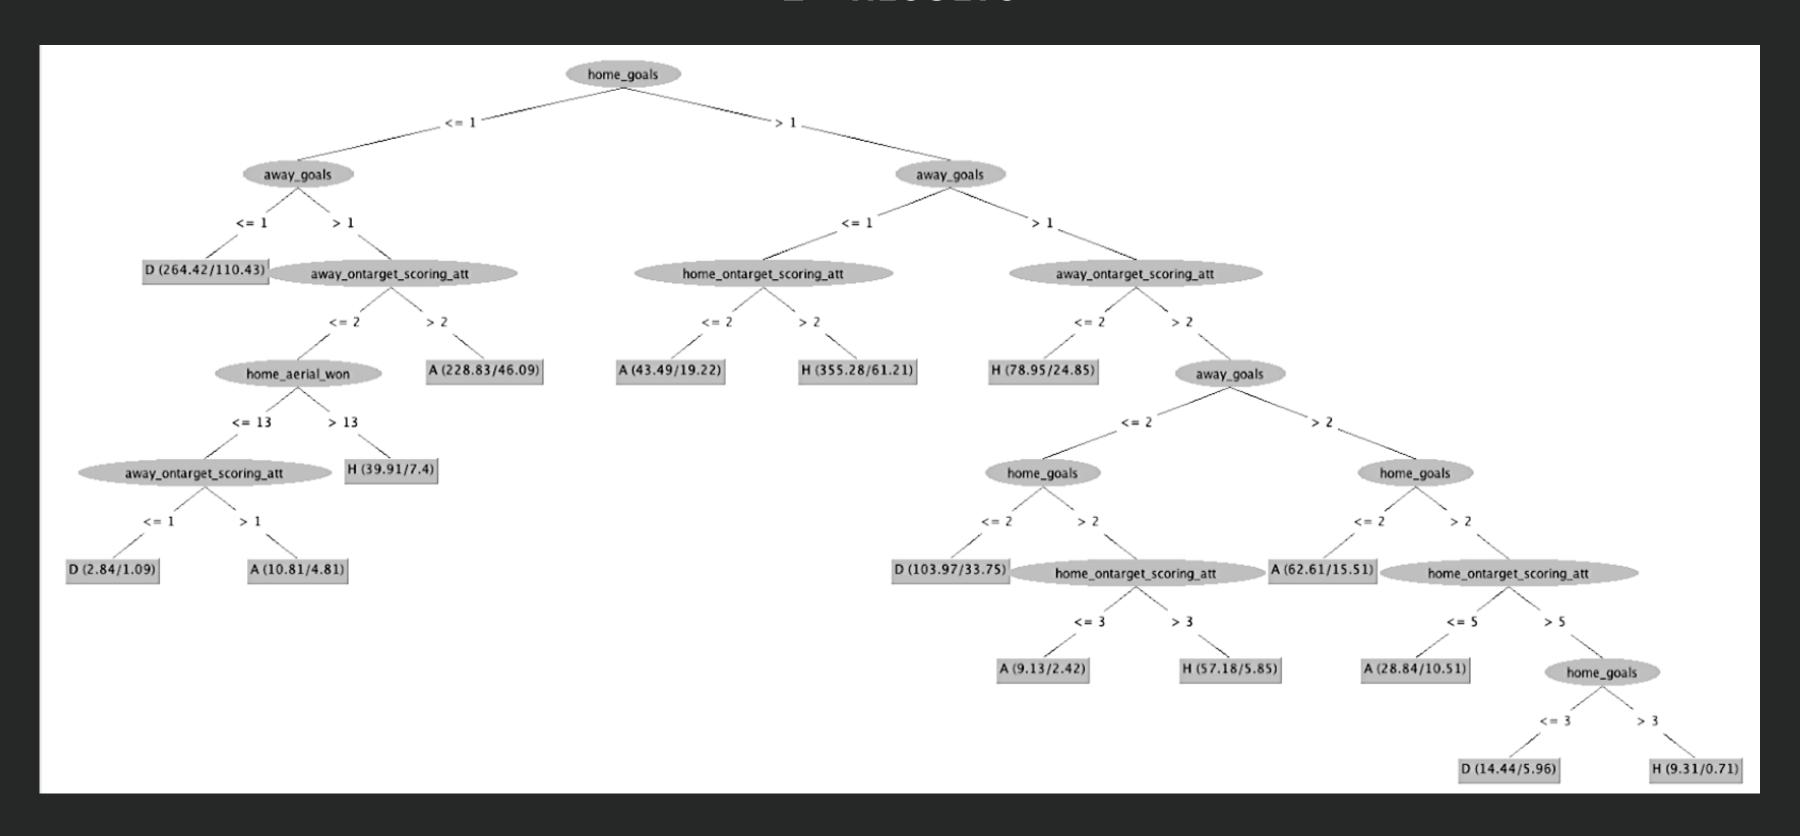

ESTABLISHMENT AND GROUPING DATA

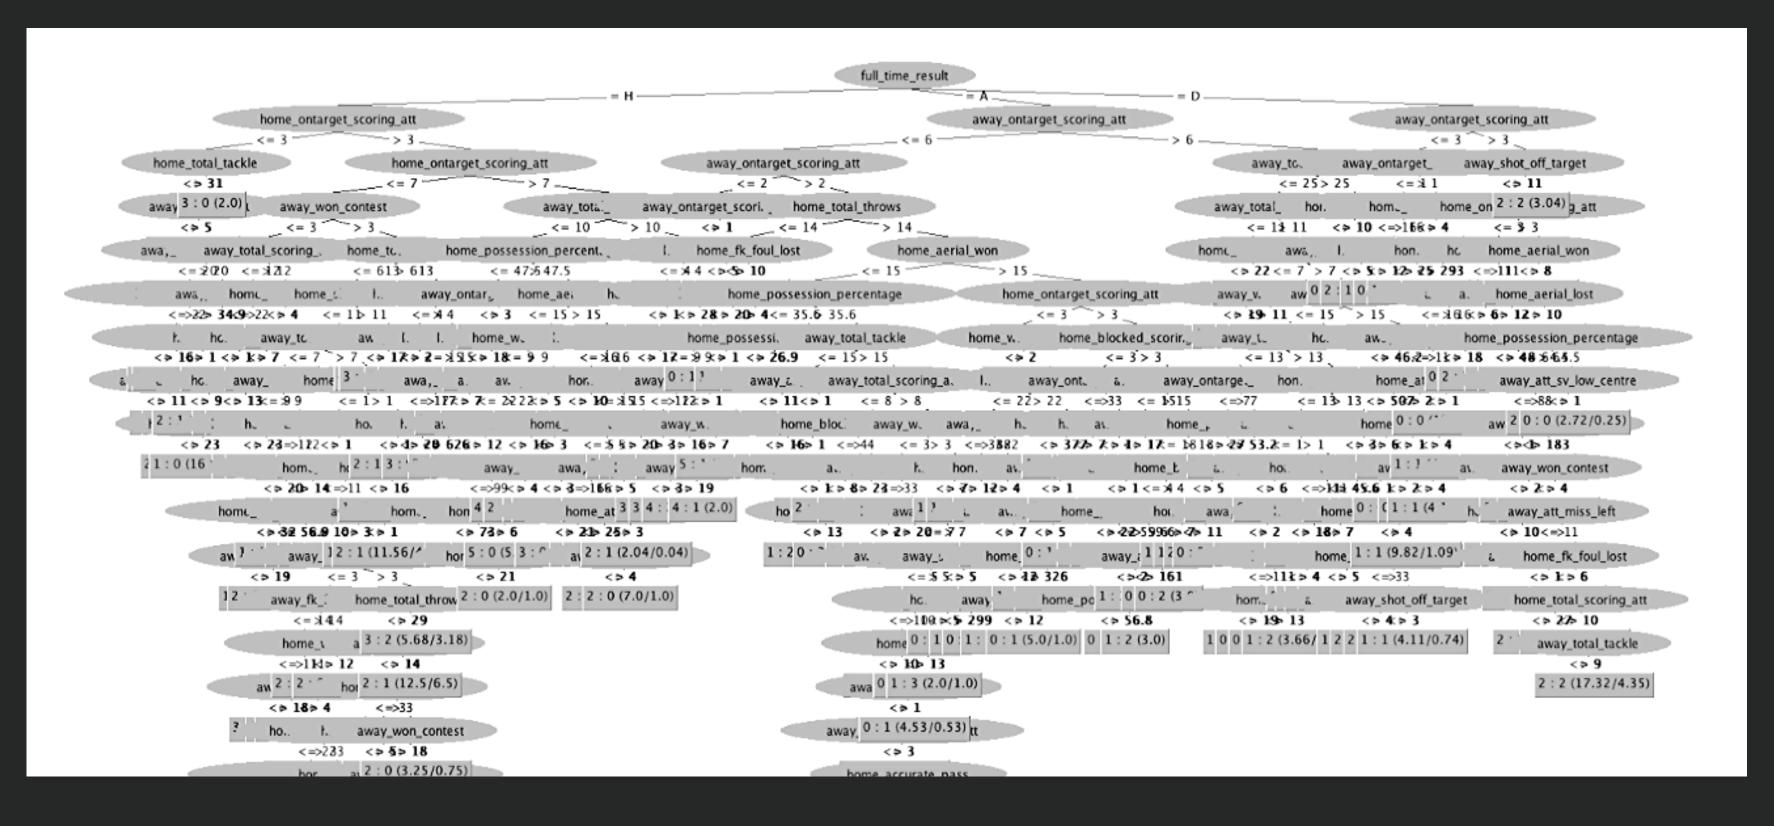

APPLICATION OF CLASSIFIERS 1 - RESULTS

APPLICATION OF CLASSIFIERS 2 - RESULTS

APPLICATION OF CLASSIFIERS REMOVING GOALS - RESULTS

APPLICATION OF CLASSIFIERS LAST - RESULTS - 47%
